New Features:

Search Functionality: We've added a long-awaited search function to help you easily find what you're looking for within the app. You can now search by keyword, category, or other relevant criteria.

Improvements:

Loading Times: We've made significant improvements to loading times throughout the app. You should now experience a faster and smoother user experience.

Navigation: The navigation menu has been redesigned for better clarity and ease of use.

Bug Fixes:

Fixed a critical bug that caused crashes on startup for some users.

Resolved an issue where images wouldn't load properly in certain cases.

Known Issues:

A minor bug is causing the font size to appear slightly larger on tablets. A fix is planned for the next release.
